ORKON INTERNATIONAL ENGINEERING TRAINING CONSULTING CO. INC. is an international engineering, training, consulting and project design organisation in Turkey. It works in infrastructure, water, environmental and transportation projects and design the environmental & water projects to Ministry of Hydraulics and roads projects to General Directorate of Highways, in Turkey and abroad. ORKON is responsible for project coordination and management as well as a report on drinking water supply sector VET requirements.

NİĞDE UNIVERSITY (NU) is a Turkish university that provides higher education to 20,000 students. NU, in line with its mission to become an international university, has entered into collaborative agreements with foreign institutions to promote the enrichment of its teaching and research programs. NU will share its experience in environmental engineering in PURE-H2O project by giving its knowledge and knowhow in water projects.

## ABOUT THE PURE-H2O PROJECT PARTNERSHIP

GAZI UNIVERSITY is one of the few universities whose history dates back to 1920s in Turkey with faculties from education to communication, from fine arts to engineering, sports to forestry, medicine to pharmacy, dentistry to science as well as economics to technology. The university started a bilateral cooperation for student (80,000) and academic staff (7,000) mobility immediately after receiving Erasmus University Charter in 2004. GAZI will be responsible for the Pure-H2O Skills Passport and for the reports that must be prepared for Turkey.

PLANART works on environmental projects, planning & urban design, including: regional and master planning in every scale, coastal zone management planning, multi-hazard risk mitigation. Planners & environmental experts work together combining their views in a holistic approach, distinguishing itself from other similar companies. PLANART has very experienced staff with high qualified competences. PLANART will be responsible for the booklet "Pure-H2O Project: Challenges & Limitations" and provide input for identifying competencies.

RESEARCH AND DEVELOPMENT CENTER "BIOINTECH" (R & D 'Biointech') is founded in accordance with European strategic goal to increase the role of R & D in introducing new knowledge into education & technological innovations. It promotes R & D in consumer & environmentally friendly technologies, & ICT by bringing together experts from Bulgarian & European universities, research organizations, industry & decision policy making institutions. BIOINTECH will be responsible for the e-learning portal & learning outcomes, as well as competency & EOF definitions.

OPEN UNIVERSITY OF THE NETHERLANDS (OUNL) is the internationally recognised Top No.1 Dutch University for Online Learning. Welten Institute is one of the biggest European & international research institutes in: technology-enhanced learning (TEL); effective, efficient & enjoyable learning (FEEEL); as well as teaching & teacher professionalization (TTP). ONUL is responsible for the testing and evaluation of project deliverables as well as profile identification of groups for testing in each country and target institution.
